

At the close of yesterday, August 30, 1,141 patients were admitted to hospitals for clinical epidemiological surveillance, of them: 35 under surveillance, 548 suspects and 558 confirmed.

For COVID-19, 5 thousand 438 samples were studied, resulting in 59 positive samples. The country accumulates 398 thousand 223 samples carried out and 4 thousand 032 positive (1.01%). Therefore, at the close of yesterday, 59 new cases were confirmed, with a cumulative of 4,032 in the country.

The 59 diagnosed cases are Cuban, of which 47 were contacts of confirmed cases, 11 without a specified source of infection and one with a source of infection abroad.

Of the 59 confirmed cases, 34 are male and 25 are female. 59.3% (35) were asymptomatic, accumulating 2,344, representing 58.1% of those confirmed to date.

Distribution by municipalities of the 59 confirmed cases (58 autochthonous and 1 imported)

Artemis (15 cases)

7 of the San Cristóbal municipality

6 of the Alquizar municipality

San Antonio de Los Baños and Mariel with 1 each.

Havana (40 cases)

12 of the Arroyo Naranjo municipality.

7 of the Boyeros municipality.

5 of the Plaza de La Revolución municipality.

6 of the municipality of Habana del Este.

La Lisa and Diez de Octubre with 3 cases each.

2 of the Centro Habana municipality.

Cerro and Marianao with 1 case each.

Mayabeque (1 imported case)

1 of the Madruga municipality.

Matanzas (1 case)

1 of the Cárdenas municipality

Ciego de Ávila (2 cases)

2 of the Majagua municipality.

Details of confirmed cases:

Sagebrush

37-year-old Cuban citizen, resident in the San Cristóbal municipality, Artemisa province.

Contact of previously confirmed case. 7 contacts are kept under surveillance.

2-year-old Cuban citizen, resident in the Alquizar municipality, Artemisa province. Contact of previously confirmed case. 18 contacts are kept under surveillance.

24-year-old Cuban citizen, resident in the San Antonio de los Baños municipality, Artemisa province. Contact of previously confirmed case. 9 contacts are kept under surveillance.

23-year-old Cuban citizen, resident in the San Cristóbal municipality, Artemisa province. Contact of previously confirmed case. 9 contacts are kept under surveillance.

45-year-old Cuban citizen, resident in the Alquizar municipality, Artemisa province. Contact of previously confirmed case. 8 contacts are kept under surveillance.

35-year-old Cuban citizen, resident in the Alquizar municipality, Artemisa province. Contact of previously confirmed case. 13 contacts are kept under surveillance.

35-year-old Cuban citizen, resident in the San Cristóbal municipality, Artemisa province. Contact of previously confirmed case. 11 contacts are kept under surveillance.

5-month-old Cuban citizen, resident in the Alquizar municipality, Artemisa province. Contact of previously confirmed case. 13 contacts are kept under surveillance.

30-year-old Cuban citizen, resident in the Alquizar municipality, Artemisa province. Contact of previously confirmed case. 18 contacts are kept under surveillance.

48-year-old Cuban citizen, resident in the Alquizar municipality, Artemisa province. Contact of previously confirmed case. 8 contacts are kept under surveillance.

54-year-old Cuban citizen, resident in the San Cristóbal municipality, Artemisa province. Contact of previously confirmed case. 10 contacts are kept under surveillance.

28-year-old Cuban citizen, resident in the San Cristóbal municipality, Artemisa province. Contact of previously confirmed cases. 10 contacts are kept under surveillance.

30-year-old Cuban citizen, resident in the San Cristóbal municipality, Artemisa province. Contact of previously confirmed case. 14 contacts are kept under surveillance.

30-year-old Cuban citizen, resident in the San Cristóbal municipality, Artemisa province. Contact of previously confirmed case. 14 contacts are kept under surveillance.

50-year-old Cuban citizen, resident in the Mariel municipality, Artemisa province. Contact of previously confirmed case. 7 contacts are kept under surveillance.

Havana

56-year-old Cuban citizen, resident in the Plaza de la Revolución municipality, Havana province. Contact of previously confirmed case. 7 contacts are kept under surveillance.

34-year-old Cuban citizen, resident in the Centro Habana municipality, Havana province. Contact of previously confirmed case. 10 contacts are kept under surveillance.

20-year-old Cuban citizen, resident in La Lisa municipality, Havana province. Contact of previously confirmed case. 11 contacts are kept under surveillance.

26-year-old Cuban citizen, resident in the Marianao municipality, Havana province. Contact of previously confirmed case. 9 contacts are kept under surveillance.

36-year-old Cuban citizen, resident in the Centro Habana municipality, Havana province. The

source of infection is investigated. 13 contacts are kept under surveillance.

56-year-old Cuban citizen, resident in the Cerro municipality, Havana province. Contact of previously confirmed case. 12 contacts are kept under surveillance.

57-year-old Cuban citizen, resident in the Habana del Este municipality, Havana province. Contact of previously confirmed case. 7 contacts are kept under surveillance.

33-year-old Cuban citizen, resident in Diez de Octubre municipality, Havana province. The source of infection is investigated. 9 contacts are kept under surveillance.

54-year-old Cuban citizen, resident in the Diez de Octubre municipality, Havana province. Contact of previously confirmed case. 9 contacts are kept under surveillance.

40-year-old Cuban citizen, resident in the Diez de Octubre municipality, Havana province. Contact of previously confirmed case. 8 contacts are kept under surveillance.

38-year-old Cuban citizen, resident in the Habana del Este municipality, Havana province. Contact of previously confirmed case. 11 contacts are kept under surveillance.

31-year-old Cuban citizen, resident in the Havana del Este municipality, Havana province.

Contact of previously confirmed case. 9 contacts are kept under surveillance.

31-year-old Cuban citizen, resident in the Habana del Este municipality, Havana province. Contact of previously confirmed case. 18 contacts are kept under surveillance.

46-year-old Cuban citizen, resident in the Habana del Este municipality, Havana province. Contact of previously confirmed case. 7 contacts are kept under surveillance.

34-year-old Cuban citizen, resident in the Habana del Este municipality, Havana province. Contact of previously confirmed case. 10 contacts are kept under surveillance.

81-year-old Cuban citizen, resident in the Plaza de la Revolución municipality, Havana province. The source of infection is investigated. 6 contacts are kept under surveillance.

47-year-old Cuban citizen, resident in the Plaza de la Revolución municipality, Havana province. Contact of previously confirmed case. 12 contacts are kept under surveillance.

33-year-old Cuban citizen, resident in the Plaza de la Revolución municipality, Havana province. Contact of previously confirmed case. 12 contacts are kept under surveillance.

48-year-old Cuban citizen, resident in the Plaza de la Revolución municipality, Havana province. The source of infection is investigated. 15 contacts are kept under surveillance.

10-year-old Cuban citizen, resident in the Arroyo Naranjo municipality, Havana province. Contact of previously confirmed case. 21 contacts are kept under surveillance.

42-year-old Cuban citizen, resident in the Arroyo Naranjo municipality, Havana province. Contact of previously confirmed case. 16 contacts are kept under surveillance.

56-year-old Cuban citizen, resident in the Arroyo Naranjo municipality, Havana province. The source of infection is investigated. 19 contacts are kept under surveillance.

48-year-old Cuban citizen, resident in the Arroyo Naranjo municipality, Havana province. The source of infection is investigated. 31 contacts are kept under surveillance.

5-year-old Cuban citizen, resident in the Arroyo Naranjo municipality, Havana province. Contact of previously confirmed case. 13 contacts are kept under surveillance.

32-year-old Cuban citizen, resident in the Arroyo Naranjo municipality, Havana province. Contact of previously confirmed case. 11 contacts are kept under surveillance.

72-year-old Cuban citizen, resident in the Arroyo Naranjo municipality, Havana province. Contact of previously confirmed case. 10 contacts are kept under surveillance.

27-year-old Cuban citizen, resident in the Arroyo Naranjo municipality, Havana province. Contact of previously confirmed case. 10 contacts are kept under surveillance.

54-year-old Cuban citizen, resident in the Arroyo Naranjo municipality, Havana province.

Contact of previously confirmed case. 18 contacts are kept under surveillance.

65-year-old Cuban citizen, resident in the Arroyo Naranjo municipality, Havana province.

Contact of previously confirmed case. 14 contacts are kept under surveillance.

65-year-old Cuban citizen, resident in the Boyeros municipality, Havana province. The source of infection is investigated. 8 contacts are kept under surveillance.

65-year-old Cuban citizen, resident in the Boyeros municipality, Havana province. Contact of previously confirmed case. 8 contacts are kept under surveillance.

37-year-old Cuban citizen, resident in the Arroyo Naranjo municipality, Havana province. The source of infection is investigated. 13 contacts are kept under surveillance.

20-year-old Cuban citizen, resident in the Boyeros municipality, Havana province. Contact of previously confirmed case. 6 contacts are kept under surveillance.

44-year-old Cuban citizen, resident in the Boyeros municipality, Havana province. Contact of previously confirmed case. 8 contacts are kept under surveillance.

72-year-old Cuban citizen, resident in the Boyeros municipality, Havana province. Contact of previously confirmed case. 5 contacts are kept under surveillance.

41-year-old Cuban citizen, resident in the Boyeros municipality, Havana province. Contact of previously confirmed case. 7 contacts are kept under surveillance.

74-year-old Cuban citizen, resident in the La Lisa municipality, Havana province. The source of infection is investigated. 8 contacts are kept under surveillance.

76-year-old Cuban citizen, resident in La Lisa municipality, Havana province. Contact of previously confirmed case. 6 contacts are kept under surveillance.

18-year-old Cuban citizen, resident in the Arroyo Naranjo municipality, Havana province. The source of infection is investigated. 14 contacts are kept under surveillance.

39-year-old Cuban citizen, resident in the Boyeros municipality, Havana province. Contact of previously confirmed case. 11 contacts are kept under surveillance.

Mayabeque

39-year-old Cuban citizen, resident in the Madruga municipality, Mayabeque province. Case with source of infection abroad. 5 contacts are kept under surveillance.

Killings

41-year-old Cuban citizen, resident in the Cárdenas municipality, Matanzas province. Contact of previously confirmed case. 10 contacts are kept under surveillance.

Ciego de Avila

46-year-old Cuban citizen, resident in the Majagua municipality, Ciego de Ávila province. The source of infection is investigated. 52 contacts are kept under surveillance.

36-year-old Cuban citizen, resident in the Majagua municipality, Ciego de Ávila province. Contact of previously confirmed case. 8 contacts are kept under surveillance.

Of the 4,032 patients diagnosed with the disease, 558 (13.8%) remain confirmed, 536, 96.1% with stable clinical evolution. 94 deaths are reported (none in the day), two evacuated, 51 discharges of the day, 3 thousand 378 recovered patients accumulate (84%). Eight patients in critical condition and 14 in serious condition are reported.

Critically ill patients:

84-year-old Cuban citizen. It comes from the Marianao Municipality, Havana province. History of Arterial Hypertension and Vascular Cell Carcinoma. He is afebrile, on mechanical ventilation, volume controlled modality, with moderate respiratory distress. Hemodynamically unstable. He maintains a transitory pacemaker due to third degree Atrio Ventricular block. Chest X-ray. Inflammatory lesions disseminated in both lung fields predominantly on the left. Reported as unstable critic.

54-year-old Cuban citizen. It comes from the Diez de Octubre municipality, Havana province. History of Chronic Lymphoid Leukemia (6 years). She is afebrile, abundant bronchial lobbtions, less edematous, on mechanical ventilation, volume controlled modality, with moderate respiratory distress. Hemodynamically unstable, blood gas with mild hypoxemia. Chest X-ray. Diffuse inflammatory mottling in both lung fields. Reported unstable criticism.

74-year-old Cuban citizen. Coming from the Marianao municipality, Havana province. History of Diabetes Mellitus. She is afebrile, without diarrhea, improvement of acute arterial ischemia in the lower right limb, dry cough, dyspnea on mobilization, spontaneously ventilating with supplemental oxygen, in the prone position. Hemodynamically stable. Chest X-ray. Inflammatory lesions in both lung fields. Reported of stable criticism.

94-year-old Cuban citizen. It comes from the La Lisa municipality, Havana province. History of Ischemic Heart Disease. She is afebrile, with slight edema in the upper limbs, on mechanical ventilation, volume controlled modality, with moderate respiratory distress. Hemodynamically unstable. Chest X-ray. Inflammatory lesions in the left base. Small pleural effusion and atelectatic component on the same side. Reported unstable criticism.

65-year-old Cuban citizen, comes from the La Lisa municipality, Havana province. History of

Arterial Hypertension and Chronic Obstructive Pulmonary Disease. She is afebrile, on mechanical ventilation through a tracheostomy, with moderate respiratory distress. Hemodynamically stable. Chest X-ray. Radiological improvement. Bibasal inflammatory-like lesions. Reported of stable criticism.

52-year-old Cuban citizen. It comes from the San Cristóbal municipality, Artemisa province. He does not refer to a Personal Pathological Background. He continues with a better state of consciousness, obeys simple orders, afebrile, with mechanical ventilation. Hemodynamically stable. Chest X-ray. Inflammatory lesions disseminated in both lung fields with a predominance of the bases. Reported as a stable critic.

52-year-old Cuban citizen. It comes from the San Cristóbal municipality, Artemisa province. History of Arterial Hypertension, Diabetes Mellitus, Deep Venous Thrombosis in both Lower Limbs, Pulmonary Thromboembolism and Obesity. He is intubated and ventilated, afebrile on mechanical ventilation, controlled modality. With slight respiratory distress. Hemodynamically stable. Chest X-ray. Bilateral inflammatory lesions. Reported as a stable critic.

56-year-old Cuban citizen. It comes from the La Castellana Psychopedagogical Center, Arroyo Naranjo Municipality, Havana province. History of Severe Mental Retardation, Diabetes Mellitus and Ischemic Heart Disease. He is spontaneously ventilating with supplemental oxygen. Hemodynamically unstable. Electrocardiogram. Sinus bradycardia, signs of acute ischemia in the anterior and upper lateral aspect. A temporary external pacemaker was placed without complications. Chest X-ray. No pleuropulmonary alterations. Reported as unstable critic.

Patients in serious condition:

79-year-old Cuban citizen. It comes from the Marianao municipality, Havana province. History of Diabetes Mellitus, Arterial Hypertension, Bronchial Asthma and Hypothyroidism. She is afebrile, spontaneously ventilating with supplemental oxygen. Hemodynamically stable. Chest X-ray. Discrete inflammatory lesions in the right base. Reported serious.

45-year-old Cuban citizen. It comes from the La Lisa municipality, Havana province. History of Arterial Hypertension and Kidney Transplantation (7 years ago). He is afebrile, short of breath on mobilization, slight jaundice tinge, spontaneously ventilating with supplemental oxygen in the prone position. Hemodynamically stable. Normal blood gases. Chest X-ray. Global cardiomegaly, inflammatory-like lesions in both hemithorax, no pleural effusion. Reported serious.

44-year-old Cuban citizen. It comes from the La Lisa municipality, Havana province. He does not report a pathological history. He is afebrile, isolated dry cough, spontaneously ventilating with supplemental oxygen, in the prone position. Hemodynamically stable. Chest X-ray. Radiological improvement. Inflammatory lesions in both lung fields predominantly on the right base. Do not spill plural. Reported serious.

82-year-old Cuban citizen. It comes from the Plaza de la Revolución municipality, Havana province. History of chronic anemia of unspecified etiology and chronic bronchitis. She is afebrile, spontaneously ventilating with supplemental oxygen. Hemodynamically stable. Chest X-ray. Signs of hyperventilation, with discrete bibasal inflammatory lesions. Reported serious.

46-year-old Cuban citizen. It comes from the Cotorro municipality, Havana province. History of Hypertension, Ischemic Heart Disease, Bronchial Asthma and Obesity. He is spontaneously ventilating with supplemental oxygen. Hemodynamically stable. Reported serious.

72-year-old Cuban citizen. It comes from the Centro Habana municipality, Havana province.

History of Arterial Hypertension, Diabetes Mellitus and Ischemic Heart Disease. (Old Acute Myocardial Infarction). She is afebrile, with signs of ischemia in the right foot, spontaneously ventilating with supplemental oxygen. Hemodynamically stable. Chest X-ray. Right medial cisuritis, resolved inflammatory lesions. Reported serious.

84-year-old Cuban citizen. It comes from the Centro Habana municipality, Havana province. History of Arterial Hypertension, Ischemic Heart Disease, Peripheral Arterial Insufficiency and Smoker. He is afebrile, edema in both lower limbs and scrotums that have been decreasing, spontaneously ventilating with supplemental oxygen. Hemodynamically stable. Lung CT. Endothoracic goiter. Bilateral pleural effusion of medium size that does not interfere with ventilatory mechanics, an image of possible effusion is observed. Reported serious.

83-year-old Cuban citizen. It comes from the Diez de Octubre Municipality, Havana province. History of Arterial Hypertension and Prostatic Hyperplasia. He is afebrile, spontaneously ventilating with supplemental oxygen. Hemodynamically stable. Chest Rx. Inflammatory-like lesions spread in both lung fields. No pleural effusion. Reported serious.

79-year-old Cuban citizen. Coming from the Guanabacoa municipality, Havana province. History of Ischemic Heart Disease. Aortic valve replacement surgery and coronary revascularization. She is conscious, afebrile, tolerates decubitus, spontaneously ventilates without supplemental oxygen. Hemodynamically stable. Chest X-ray. Medium-sized right pleural effusion. Reported serious.

62-year-old Cuban citizen. Coming from the Sandino municipality, Pinar del Río province. History of undergoing double mitral and aortic valve replacement. She is conscious, afebrile, with an inflamed surgical wound, without respiratory symptoms, spontaneously ventilating without supplemental oxygen. Hemodynamically stable. Echocardiogram. Good contractility with decreased pericardial effusion. Chest X-ray. Radiological improvement, inflammatory lesions in both lung bases. Reported serious.

66-year-old Cuban citizen. It comes from the Marianao municipality, in the Havana province. History of Diabetes Mellitus Hypertension. She is afebrile, conscious, cooperative, without cough, spontaneously ventilating with supplemental oxygen. Hemodynamically stable. Chest X-ray. Bibasal inflammatory lesions. Reported serious.

49-year-old Cuban citizen. It comes from the La Castellana Psychopedagogical Center, Arroyo Naranjo Municipality. History of Severe Mental Retardation, Arterial Hypertension and Bronchial Asthma. He is afebrile, spontaneously ventilating without supplemental oxygen, hemodynamically stable. Chest X-ray. Reported serious.

85-year-old Cuban citizen. It comes from the San Cristóbal Municipality, Artemisa province. History of recurrent ischemic cerebrovascular disease, two-month-old non-operated hip fracture, Grade II - III pressure ulcers. He is afebrile, conscious, drowsy, with slight polypnea and mobilizing all 4 limbs to pain, spontaneously ventilating with supplemental oxygen. Hemodynamically stable. Chest X-ray. Inflammatory lesions in the right base with slight pleural effusion. Reported serious.

Until August 30, 185 countries with COVID-19 cases are reported, the confirmed cases amount to 25 million 029 thousand 408 (+ 269 thousand 279) and 843 thousand 158 deaths (+ 5 thousand 579) for a fatality of 3.36 % (-0.02).

The Americas region reports 13 million 307 thousand 641 confirmed cases (+133 thousand 193), 53.16% of the total cases reported in the world, with 466 thousand 006 deaths (+ 3

thousand 565) for a fatality of 3, 50% (-0.01). (Taken from <https://salud.msp.gob.cu>)
